

ABCpred Prediction Server

INPUT INFORMATION

Sequence name	
Length of the sequence	806
Number of 16mers from the input sequence	791
Threshold setting (Default value is 0.5)	0.51

TABULAR RESULT

Predicted B-cell epitope

The predicted B cell epitopes are ranked according to their score obtained by trained recurrent neural network.
Higher score of the peptide means the higher probability to be as epitope.
All the peptides shown here are above the threshold value chosen.
